

The diagram illustrates a road cross-section with a proposed cut. A vertical dashed line represents the centerline (CL). A horizontal arrow labeled 'Cutting Direction' points to the left. The road profile is shown with various dimensions: 12' from the left edge to the start of the cut, 16' from the start of the cut to the peak of the embankment, 18' from the peak to the right edge, and 20' from the peak to the right edge. The road is divided into 'Zone A' and 'Zone B'. Handwritten notes include 'made hidden' (pointing to a dashed line), 'removed hidden lines' (pointing to a solid line), and 'added crosshatching' (pointing to a hatched area). The diagram also shows a 32' dimension from the left edge to the peak of the embankment, and a 22' dimension from the left edge to the start of the cut.
